Catalogue D
1915

Milwaukee Brass Mfg. Co.

Manufacturers of
Plumbers' Brass Goods

Established in 1892

Main Office and Works:
Lapham and Barclay Streets, Milwaukee, Wis.

New York Office: 48 Cliff Street
HENRY STEIN, Representative

San Francisco Office: Rialto Bldg.
E. A. KEITHLEY, Representative

THE goods shown in this catalogue are all of our own manufacture. The halftone illustrations are accurate reproductions of the originals and show the beauty of form and finish of our product.

Our trade mark **PRESSURE
PROVED** signifies that each completed article and component part thereof is tested under 150 lbs. water pressure.

We have incorporated the New List Prices adopted by the National Association of Brass Manufacturers, which went into effect January 1, 1915.

Numerous new items have been added to our various lines since issuing our C Catalogue and a new and complete line of DRINKING FOUNTAIN BUBBLERS is shown in the rear of the book. This section of Drinking Fountain Bubblers we also issue separately in booklet form, which will be furnished on application.

CLASSIFIED INDEX

(GENERAL INDEX IN REAR OF BOOK)

Bibbs, Stops, Sill Cocks, Hopper Cocks and Urinal Cocks	Page
Compression	2- 45

TELEGRAPH CIPHER CODE

Vaccine.....	Ship at once, by express
Vacuum.....	Ship at once, by freight
Vagrant.....	Ship at once, a part of order
Vain.....	Ship the whole order in one lot
Valet.....	Ship earliest date possible and telegraph when
Valise.....	Duplicate order
Valley.....	Duplicate order if at
Valvule.....	Wanted badly; when will you ship? Telegraph when
Vamose.....	How soon can you ship
Vampire.....	How soon and at what price can you ship
Vandal.....	When will you ship order
Vandyke.....	When will you complete order
Vanguard.....	Cancel order
Vanquish.....	Cancel balance of order
Vapor.....	Referring to order
Varix.....	Referring to your telegram of
Varnish.....	Referring to your letter of
Vase.....	Same as furnished
Vastness.....	Will you accept at
Vault.....	Quote price by telegraph on
Vaunt.....	Quote price by mail on
Veal.....	We shipped by express
Veck.....	We shipped by freight
Vector.....	We will try to ship
Vedette.....	We can ship in part
Veil.....	We can ship balance
Vein.....	We cannot ship before
Veldt.....	We cannot promise definitely when we can ship
Velite.....	Shall we ship what we have ready
Vellum.....	We can ship today
Veloce.....	We can ship tomorrow
Velours.....	We can ship in two days
Velvet.....	We can ship in three days
Vender.....	We can ship in four days
Veneer.....	We can ship in five days
Venom.....	We can ship in one week
Venter.....	We can ship in two weeks
Ventil.....	We can ship in three weeks
Venue.....	We can ship in four weeks
Verdant.....	We have in stock
Verdure.....	We have none in stock
Vermin.....	We have no order
Vernier.....	We have no patterns for
Verse.....	Order is shipped. Cancellation too late
Verst.....	We will accept order
Vervain.....	We will duplicate order at
Vesper.....	We cannot accept at price named. Shall we enter at
Vest.....	Shall we enter order
Veto.....	Withdraw all prices
Veuve.....	Unless you advise us to the contrary, we will ship
Vex.....	Freight allowance, per cwt.
Vexer.....	F. O. B. Milwaukee

Fig. C-72 $\frac{1}{2}$ (Cetic)

Fig. C-73 $\frac{1}{2}$ (Cetin)

When ordering state **OUTSIDE** Diameter of Tubing for Slip Joint.

The Compacto Stop combines **economy of design** with **neat appearance, strength and full waterway.**

The **Combination Cap** affords a larger **Packing Chamber** than the ordinary type of stuffing box and is provided with a **Braided Ring Packing** which makes a **perfect joint.**

This Cap can be **taken up readily** and can be **repacked easily** with ordinary **Wick Packing.**

The Stem is provided with a **Square Thread** of large diameter and all the threads are **always engaged**, whether open or closed, thus **minimizing the wear.**

The Slip Joint has a large **beveled Cavity** and a conical pure rubber **Gasket** with **brass Friction Ring**, thus making a **very tight joint.** Lugs are provided in the Slip Joint end to **prevent the Tubing from entering the Seat Chamber.**

The working parts of Leviathan Bibbs are only THREE in number, viz.: VALVE STEM, SPRING and LEVER STEM. The SPRINGS are made of PHOSPHOR BRONZE and are very strong, yet the bibbs are VERY EASY TO OPERATE. The LEVER STEMS have EXTRA LONG BEARINGS, insuring long wear and service without repair. The Stuffing Box on the lever stem is ABSOLUTELY TIGHT, without binding.

Add For 3 Inch Shank (Regular Length 2 ¹/₄ Inches)

The Dozen \$ 2.40

Furnished regularly with ¹/₄ inch I. P. Male Couplings. Other styles on page 180.

These cocks, Fig. M-1 and Fig. M-2, close slowly and with the pressure. They are therefore positive in action and will not pound or rattle under the heaviest pressure. The syphonic action of the spout prevents leakage at the stem and the absence of all packing washers prevents binding.

The LEVIATHAN Self Closing Basin Cock solves the problem of a perfect Self Closing Cock with side or lever handle feature.

The body and spout are in one piece, and the construction throughout is massive and durable.

The working parts are only three in number, viz.: Valve Stem, Spring and Lever Stem.

The Valve Stem is made in one piece and is so perfectly guided that it cannot bind, bend or break.

The Spring is made of Phosphor Bronze and is very strong, yet the cock is very easy to operate.

The Lever Stem has extra long bearings, insuring long wear and service without repair.

The Stuffing Box on the lever stem is absolutely tight without binding and cannot be screwed up tight enough to make it bind.

Bubblers for Drinking Fountains

IN presenting our line of CROWN BUBBLERS for Drinking Fountains we have tried to adapt ourselves to the new conditions occasioned by the almost universal adoption of this recent innovation, but at the same time we have endeavored to avoid the freak combinations evolved in the earlier experimental stages and have confined ourselves to those styles which experience has proven the most practical.

We have discarded the cup and ring guard types and confine ourselves to the ball type in order to overcome the danger of infection from the contact of the nose with the cup or the guard. The ball is constantly rinsed by the water, whereas the cup and the guard are usually not.

Our patented Crown Bubblers are COMPACT and SIMPLE in construction.

The PERFORATED CROWN absolutely PREVENTS SQUIRTING by mischievous persons.

The COMBINATION DISCHARGE from the center and periphery of the jet insures a SOLID CRYSTALLINE BUBBLE.

The AMOUNT OF FLOW is easily and PERFECTLY REGULATED by means of a milled locknut placed immediately below the ball and by a check valve in the tube to which the locknut is fastened.

The TWO-ARM LEVER arrangement on our Automatic Self Closing Bubblers WORKS EASILY and does not bind. We consider it preferable to the ring type because it is more sanitary, more ornamental and easier to keep clean.

This section of Drinking Fountain Bubblers we also issue separately in booklet form, which will be furnished on application.

Fig. B-1 (Badge)

NICKEL PLATED

Fig. B-1, $\frac{3}{8}$ or $\frac{1}{2}$ inch I. P. Each \$3.00

ILLUSTRATION IS FULL SIZE

The Regulating Device is omitted on Fig. B-1 and the flow must therefore be controlled at the Valve End.
